

I discovered satellite radio when I bought my new Honda Accord. This is great! I drive over 30,000 miles a year on sales trips, and throughout the long stretches of Texas I could never get a signal. CD's and tapes got boring and expensive. Now I can get national and international news, weather and sports, comedy and old time radio dramas that keep me informed, entertained and safe. Please let satellite radio continue to broadcast traffic and weather reports as they're doing. Competition is good and American. I don't like the mindless and irrelevant banter of morning or afternoon drive shows on local AM stations, or the droll commentary on FM. I'll be the one to decide who and what I listen to, and for whom I vote.

Thanks.
